

Color it Dunn.

Communicate with Color Hard Copy from the 631 System

Exciting computer images, digitally processed or original graphics, should not be confined to your color terminal. Their communication value is wasted. That's why Dunn

Instruments invented versatile, affordable photographic hard copy. Made by the 631 Color Camera System.

For over a year now, 631 Systems have been at work in applications ranging from

remote sensing to animation, from business presentation graphics to NASA's Saturn mission.

Media versatility
Instant 8x10 prints on Polaroid® Type 808 film, overhead transparencies, 35mm slides and animated 16mm film — all are within the capabilities of a single system. Their incredible resolution, chromatic vividness and accuracy will astonish you. So, too, will the speed, ease and assurance with which you

produce them, thanks to microprocessor-automated camera operation and exposure control.

Multi-imaging power
Recording images side by side aids in comparative analysis and presentation planning. It also reduces film cost. Our software-based format selection means the freedom to tailor the

configuration of images to your needs. It's a Dunn Instruments exclusive.

Interfacing ease

The 631 System interfaces with ease to every kind of computer system and color terminal. It is sold complete, and installed worldwide by an experienced sales and service force.

Call 415/957-1600 and we'll put you in touch with your nearest Dunn Instruments representative. Or write us at 544 Second Street, P.O. Box 77172, San Francisco, CA 94107.
